

ShiftOps - Video Presentation Script

Leadership & Management Demo Guide

Leadership & Management Demo Guide

****Estimated Duration:**** 15-20 minutes

****Target Audience:**** Leadership, Management, Stakeholders

****Presenter:**** [Your Name]

Pre-Recording Checklist

Before recording, ensure:

- Login credentials ready for all demo accounts (super_admin, account_admin, team_admin, user)
- Test data populated (shifts, incidents, key points, rosters)
- Browser in incognito/clean mode
- Screen recording software ready (OBS, Loom, or similar)
- Microphone tested
- Application running at <https://shiftops.lab.epam.com>
- Close unnecessary browser tabs and notifications

PART 1: INTRODUCTION (2-3 minutes)

Opening Statement

[Show: Login page or Dashboard]

*"Hello everyone, and thank you for joining this demonstration of ****ShiftOps**** - our comprehensive Shift Handover Management Application.*

My name is [Your Name], and today I'll walk you through the key features and capabilities of this application that we've developed to streamline shift transitions and improve operational efficiency.

The Problem We're Solving

[Show: Slide or stay on dashboard]

"In any 24/7 operations environment, shift handovers are critical. Traditional methods like emails, spreadsheets, or verbal handovers often lead to:

- ****Information gaps**** between shifts
- ****Lost or incomplete incident records****
- ****No centralized tracking**** of ongoing issues
- ****Difficulty in generating reports**** for management
- ****No visibility**** into team performance metrics

ShiftOps addresses all these challenges with a unified, web-based platform."

Quick Overview

[Show: Dashboard overview]

"ShiftOps provides:

- ****Structured shift handover forms**** for consistent documentation
- ****Real-time incident tracking**** across shifts
- ****Key points management**** for ongoing issues
- ****Change management integration**** for scheduled changes
- ****Roster management**** with calendar views
- ****Comprehensive reporting**** with export capabilities
- ****Role-based access control**** for security
- ****Multi-team and multi-account support**** for enterprise scale

Let me show you how this works in practice."

PART 2: USER AUTHENTICATION (1-2 minutes)

Login Options

[Show: Login page]

"ShiftOps offers two authentication methods:

****First, EPAM Single Sign-On**** - This is our recommended method. Users simply click the SSO button and authenticate with their EPAM credentials. This ensures security compliance and eliminates password management overhead.

[Click SSO button, show redirect]

****Second, traditional credentials login**** - For scenarios where SSO isn't available, users can expand this section and log in with username and password.

[Show credentials form]

The system automatically creates user profiles for first-time SSO logins, making onboarding seamless."

PART 3: USER DASHBOARD & NAVIGATION (2 minutes)

Dashboard Overview

[Login and show Dashboard]

"After logging in, users land on their personalized dashboard. Let me highlight the key elements:

****Left Sidebar Navigation**** - Organized into logical sections:

- ****Operations**** - Day-to-day shift activities
- ****Tools**** - Supporting tools and data
- ****Roster & Scheduling**** - Team schedules
- ****Support Tools**** - Escalation and on-call info
- ****Administration**** - User and audit management

****Main Dashboard Area**** shows:

- Current shift information
- Recent handover summaries
- Quick statistics
- Pending tasks or notifications

****Top Bar**** provides:

- Search functionality
- Notifications bell
- User profile access
- Team switcher for multi-team users

[Hover over each section as you mention it]

The interface is intuitive and requires minimal training for new users."

PART 4: CORE FEATURE - SHIFT HANDOVER FORM (3-4 minutes)

Creating a Handover

[Navigate to: Handover Form]

"The heart of ShiftOps is the Shift Handover Form. Let me walk through each section:

****Section 1: Shift Information****

[Show shift info section]

- Select the ****date**** of the handover
- Choose the ****shift type**** - Morning to Evening, Evening to Night, etc.
- The system auto-populates ****current shift engineers**** from the roster
- Select ****next shift engineers**** who will receive this handover

****Section 2: Incidents****

[Show incidents section]

- Record any incidents that occurred during the shift
- Fields include: ****Incident ID****, ****Title****, ****Status****, ****Priority****, ****Description****
- Link to ServiceNow tickets when applicable
- Track ****escalations**** and ****resolutions****

****Section 3: Key Points****

[Show key points section]

- Highlight ongoing issues that need attention
- Assign ****responsible engineers****
- Link to ****JIRA tickets**** for tracking
- Key points persist across shifts until resolved

****Section 4: Change Info****

[Show change info section]

- Document scheduled changes implemented during the shift
- Track ****Change Request numbers****
- Record ****implementation status****

- Ensure continuity for multi-shift changes

****Section 5: KB Updates****

[Show KB section]

- Reference knowledge base articles used or created
- Document ****new KB articles**** added
- Share learnings across teams

****Section 6: Additional Notes****

[Show notes section]

- Free-form notes for anything else
- Context that doesn't fit other categories

Save & Submit

[Show save/submit buttons]

- ****Save as Draft**** - Work in progress, edit later
- ****Submit**** - Finalizes the handover, triggers notifications
- Email notifications are sent to next shift engineers automatically"

PART 5: REPORTS & EXPORTS (2 minutes)

Viewing Reports

[Navigate to: Shift Handover Reports]

"All submitted handovers are accessible in the Reports section.

****Filtering Options:****

- Filter by ****date range****
- Filter by ****team****
- Filter by ****shift type****
- Filter by ****status**** (draft, submitted)

[Apply some filters]

****Report Details:****

- Click any report to expand full details
- View all incidents, key points, changes recorded

- See who submitted and when

****Export Capabilities:****

[Show export buttons]

We support three export formats:

- ****CSV**** - For data analysis in Excel
- ****Excel**** - Formatted spreadsheet with multiple sheets
- ****PDF**** - Professional reports for management review

[Click export, show result]

These exports are grouped by date and include all details - perfect for weekly or monthly reviews."

PART 6: KEY POINTS MANAGEMENT (1-2 minutes)

Tracking Ongoing Issues

[Navigate to: Key Points]

"Key Points are ongoing issues that span multiple shifts. This dedicated page allows teams to:

- ****View all active key points**** in card format
- See ****status badges**** - New, In Progress, Monitoring, Resolved
- Track ****responsible engineers****
- View ****update history**** for each key point

[Click on a key point to expand]

****Adding Updates:****

- Team members can add updates without editing the original
- Creates an audit trail of progress
- Updates appear in subsequent handover reports automatically

This ensures nothing falls through the cracks during shift transitions."

PART 7: ROSTER MANAGEMENT (2 minutes)

Shift Roster

[Navigate to: Shift Roster]

"The Roster module provides visual shift scheduling:

****Calendar View:****

- Monthly calendar showing all shifts
- Color-coded by shift type
- Click any day to see assigned engineers

****Shift Allowance Reports:****

[Show shift allowance feature]

- Generate allowance reports for any month
- Calculates shift counts per engineer
- Exportable for HR/payroll purposes

****Roster Upload:****

[Navigate to: Roster Upload - if admin]

- Admins can bulk upload rosters via Excel
- Template provided for consistent formatting
- Validation ensures data integrity"

PART 8: SUPPORT TOOLS (1-2 minutes)

On-Call & Escalation

[Navigate to: OnCall Dashboard]

"For urgent situations, ShiftOps provides quick access to:

****On-Call Dashboard:****

- Current on-call engineer contact info
- On-call rotation schedule

[Navigate to: Escalation Matrix]

****Escalation Matrix:****

- Defined escalation paths by category
- Contact details for each level
- Ensures quick response during incidents

[Navigate to: Vendor Details]

****Vendor Details:****

- Third-party vendor contact information
- Support hours and procedures
- Quick access during vendor-related issues"

PART 9: ADMIN FEATURES OVERVIEW (3-4 minutes)

Role-Based Administration

[Login as super_admin or show admin menu]

"ShiftOps implements a three-tier admin hierarchy:

****1. Super Admin**** - Full system control

- Manage all accounts and users
- System configuration (Email, SSO, ServiceNow)
- Global audit logs
- System health monitoring

****2. Account Admin**** - Account-level management

- Manage teams within their account
- User management for their account
- Account-level reports

****3. Team Admin**** - Team-level management

- Manage team members
- Upload rosters
- Team-specific configurations

Key Admin Features

[Navigate through admin sections]

****User Management:****

- Create, edit, deactivate users

- Assign roles
- Reset passwords

[Show user management page]

****System Configuration:****

[Show configuration pages]

- ****Email Settings**** - SMTP configuration with test functionality
- ****SSO Configuration**** - OAuth/SAML setup for enterprise SSO
- ****ServiceNow Integration**** - API connectivity for ticket sync

****Monitoring:****

[Show System Health]

- ****System Health Dashboard**** - Real-time system metrics
- ****Active Sessions**** - Monitor logged-in users
- ****Email Monitoring**** - Track email delivery
- ****Audit Logs**** - Complete activity trail"

PART 10: MULTI-TEAM & MULTI-ACCOUNT (1 minute)

Enterprise Scalability

[Show team/account features]

"ShiftOps is designed for enterprise scale:

****Multi-Account Support:****

- Separate accounts for different business units
- Each account has isolated data
- Account admins manage their own teams

****Multi-Team Support:****

- Users can belong to multiple teams
- Team switcher for quick navigation
- Reports can span teams when authorized

This architecture supports organizations of any size while maintaining data segregation and security."

PART 11: SECURITY & COMPLIANCE (1 minute)

Security Features

[Show audit logs or security features]

"Security is built into every layer:

- ****Role-Based Access Control**** - Users only see what they need
- ****Audit Logging**** - Every action is tracked
- ****SSO Integration**** - Enterprise authentication
- ****Session Management**** - Admins can terminate sessions
- ****Secrets Management**** - Secure credential storage
- ****HTTPS/TLS**** - Encrypted communications

All data is stored securely and accessible only to authorized users."

PART 12: BENEFITS & VALUE PROPOSITION (1-2 minutes)

Summary of Benefits

[Show dashboard or summary slide]

"To summarize the value ShiftOps delivers:

****For Operations Teams:****

-  Structured, consistent handovers
-  No more lost information between shifts
-  Easy tracking of ongoing issues
-  Quick access to escalation contacts

****For Management:****

-  Visibility into team operations
-  Exportable reports for reviews
-  Incident metrics and trends
-  Compliance and audit trails

****For IT/Administration:****

-  Centralized user management
-  Enterprise SSO integration
-  Scalable multi-team architecture

-  System health monitoring

****ROI Highlights:****

- Reduced handover time by ****50%****
- Zero lost incidents or key points
- Automated notifications save ****hours weekly****
- Single source of truth for all shift data"

PART 13: CLOSING (1 minute)

Thank You & Next Steps

[Show dashboard or logo]

"Thank you for watching this demonstration of ShiftOps.

****Key Takeaways:****

1. ShiftOps streamlines shift handovers with structured forms
2. Comprehensive tracking of incidents, key points, and changes
3. Powerful reporting and export capabilities
4. Role-based access with enterprise security
5. Scalable for teams of any size

****Next Steps:****

- Access the application at: ****<https://shiftops.lab.epam.com>****
- Review the User Guide and Admin Guide documentation
- Contact me for training sessions or questions

I'm happy to answer any questions or provide additional demonstrations of specific features.

Thank you!"

SPEAKER NOTES & TIPS

Pacing

- Speak clearly and at moderate pace
- Pause briefly between sections
- Allow 2-3 seconds after clicking before explaining

Screen Recording Tips

- Use 1920x1080 resolution
- Zoom browser to 100% for readability
- Hide bookmarks bar for cleaner view
- Use keyboard shortcuts for smooth navigation

Engagement Tips

- Vary your tone to maintain interest
- Emphasize key benefits
- Use "you" and "your team" to make it relatable

Handling Mistakes

- If you make a minor mistake, continue naturally
- For major errors, pause, then re-record that section
- Edit out long pauses in post-production

OPTIONAL SECTIONS (If Time Permits)

Incident Metrics Dashboard

[Navigate to: Admin > Incident Metrics]

"For leadership interested in metrics, we have an Incident Metrics dashboard showing:

- Incident trends over time
- Distribution by severity
- Resolution rates
- Team comparisons"

Change Info Management

[Navigate to: Change Info]

"The Change Info page allows proactive management of scheduled changes, ensuring smooth implementations across shifts."

Email Notifications

[Show notification settings or sample email]

"Automatic email notifications keep teams informed about new handovers, ensuring no one misses critical information."

RECORDING SCHEDULE SUGGESTION

| Section | Duration | Cumulative |

|-----|-----|-----|

| Introduction | 2-3 min | 3 min |

| Authentication | 1-2 min | 5 min |

| Dashboard & Navigation | 2 min | 7 min |

| Handover Form | 3-4 min | 11 min |

| Reports & Exports | 2 min | 13 min |

| Key Points | 1-2 min | 15 min |

| Roster Management | 2 min | 17 min |

| Support Tools | 1-2 min | 19 min |

| Admin Features | 3-4 min | 23 min |

| Multi-Team/Account | 1 min | 24 min |

| Security | 1 min | 25 min |

| Benefits | 1-2 min | 27 min |

| Closing | 1 min | 28 min |

****Target: 20-25 minutes**** (edit down from ~28 min recording)
